PIM400-485
Panel Interface Module
For RS485 Communication

Overview
The PIM400-485 seamlessly integrates to select access control panels via RS485, eliminating the need for reader interface modules. Each PIM400-485 supports up to 16 wireless access devices such as AD-400 locks.

Reliability
Reliable communications result from several technological advances and incorporated features. 900 MHz spread spectrum technology enables high transmission power in a license-free band. Error detection algorithm maintains data integrity on each transmission and redundant transmissions ensure communication success. Periodic “heartbeat” signals provide supervision and assure reliable RF communications are maintained. Lastly, Dynamic Channel Switching (DCS) can be enabled to overcome harsh RF environments by automatically changing channels to avoid potential interference.

Security
Used extensively by government and military organizations, spread spectrum technology provides significant security advantages over conventional transmission methods. Wireless access devices utilize spread spectrum transmissions, which are encrypted with AES 128-bit keys, to yield a system that is virtually uncompromisable. In addition, scalability is virtually unlimited as each AD-Series wireless access module has nearly a million addresses to choose from during the linking process.

Centralized Lock/Unlock Command in 10 Seconds or Less
Patent-pending Wake-up On Radio (WOR) feature drives communication from the PIM400 to any or all linked wireless devices in 10 seconds or less. This innovative feature works efficiently in parallel with periodic “heartbeat” to maintain up to 2 year battery life on wireless devices such as the AD-400 locks. Response rate can be field configured down to 1 second with consideration of battery life. When Wake-up On Radio is used in critical applications Dynamic Channel Switching should also be enabled.

Features and Benefits
- 900 MHz Spread Spectrum RF technology for long range, reliable communications
- Automatic linking to remote wireless access points with 10 channel frequencies to select from enables easy commissioning
- AES-128 bit Encrypted Spread Spectrum transmissions
- 5 visual indicators to quickly pinpoint and display status
- Flash memory for easy firmware upgrades
ADDITIONAL FEATURES

**Reliable Communications**
900 MHz band enables longer transmission ranges. In general, signal propagation with longer wavelengths travel a greater distance and penetrate through, and around objects better than signals with shorter wavelengths.

**Online Communications (Heartbeat)**
Regular communications between the AD-Series wireless access module and PIM400 monitor transmission presence and integrity. Online communications enable the PIM400 to download information or instructions such as unlock and relock.

**Auto Addressing (Linking)**
One of the final steps in the installation process is called “linking”. Linking ties a specific wireless access module to a selected PIM400 and assigns a unique address. There are over 65,000 unique addresses available per channel, providing nearly a million combinations for virtually unlimited scalability.

**Assured Communications**
A Packet-Error-Rate-Test (PERT) is performed during linking at reduced power levels to ensure reliable communication during operation.

**Encoded Transmissions**
Each RF transmission is encrypted with AES-128 bit keys to provide virtually uncompromisable security.

**Tamper**
The PIM400 cover is monitored by a tamper switch.

**Visual Indications**
- Power on
- Microprocessor running
- Linking status
- PIM receiving RF data
- PIM transmitting RF data
- PIM receiving RS485 data
- PIM transmitting RS485 data
- PIM firmware version
- PIM tamper status

**Access Point Status Available Through RS485 Connection**
- Card and Keypad Data
- Door position
- Loss of RF communication
- Request-to-Exit
- Request-to-Enter
- Low battery
- PIM tamper
- Mechanical Key override
- Deadbolt position
- Interior Cover tamper guard
- Lock/Unlock status
- Interior push button

**Configurable Items from PIM400-485**
- Wake up On Radio (WOR)
- Heartbeat frequency
- Relock parameters
- Card data format conversion
- Extended unlock
- Fail Safe/Fail Secure/Fail As-Is
- Door held pre-alarm
- Cache memory parameters
- Dynamic channel switching (DCS)
- Reader Configuration
- Keypad Configuration
- Inside pushbutton configuration
- User interface configuration

### PIM400-485 Specifications

<table>
<thead>
<tr>
<th>Specification</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Frequency Range</strong></td>
<td>902-928 MHz</td>
</tr>
<tr>
<td><strong>Modulation</strong></td>
<td>900 MHz spread spectrum, direct sequence, 10 channels</td>
</tr>
<tr>
<td><strong>RF Interference Avoidance</strong></td>
<td>Optional Dynamic Channel Switching</td>
</tr>
<tr>
<td><strong>Transmission/Encryption</strong></td>
<td>AES-128 bit Key (optional)</td>
</tr>
<tr>
<td><strong>Credential Verification Time</strong></td>
<td>&lt; 1 second*</td>
</tr>
<tr>
<td><strong>Communication Range</strong></td>
<td>Up to 200 ft (61 m) with obstructions</td>
</tr>
<tr>
<td></td>
<td>Up to 1000 ft (305 m) clear line of site</td>
</tr>
<tr>
<td></td>
<td>Up to 2000 ft (609 m) line of site with high gain antenna on PIM400</td>
</tr>
<tr>
<td></td>
<td>Up to 4000 ft (1219 m) line of site with high gain antennas on PIM400 and WR400</td>
</tr>
<tr>
<td><strong>Visual/Audible Communications</strong></td>
<td>5 LEDs for Status Indicators</td>
</tr>
<tr>
<td><strong>System Interface</strong></td>
<td>RS485</td>
</tr>
<tr>
<td><strong>Power Supply</strong></td>
<td>12 VDC or 24 VDC</td>
</tr>
<tr>
<td><strong>Voltage Range</strong></td>
<td>9.5 VDC to 26 VDC</td>
</tr>
<tr>
<td><strong>Max Current Requirement</strong></td>
<td>Up to 250 mA</td>

### ORDERING INFORMATION

**PIM400-485** – Panel Interface Module with outdoor enclosure standard. Supports up to 16 access points via RS485 with select brands of access control panels.

**Optional Accessories**
- **ANT400-REM-I/O** – Omni-directional remote indoor/ outdoor antenna module. Requires available Grounding Kit (MGB+MCAS) for outdoor installations
- **ANT400-REM-I/O+6DB** – Directional, flat panel, remote indoor/ outdoor antenna with 6db of gain. Requires available Grounding Kit (MGB+MCAS) for outdoor installations
- **MGB+MCAS** – Grounding Kit for outdoor installations
- **ANT400-REM-Ceiling** – Omni-directional ceiling mount indoor remote antenna
- **ANT400-REM-Hall** – Bi-directional indoor hall application remote antenna
- **HHD KIT** – Handheld Device with SUS installed and HH-USB cable
- **593PI-12DC** – 12 VDC power supply
